

Mini Aluminum Letter Bending Machine Q-1

Technical Specifications

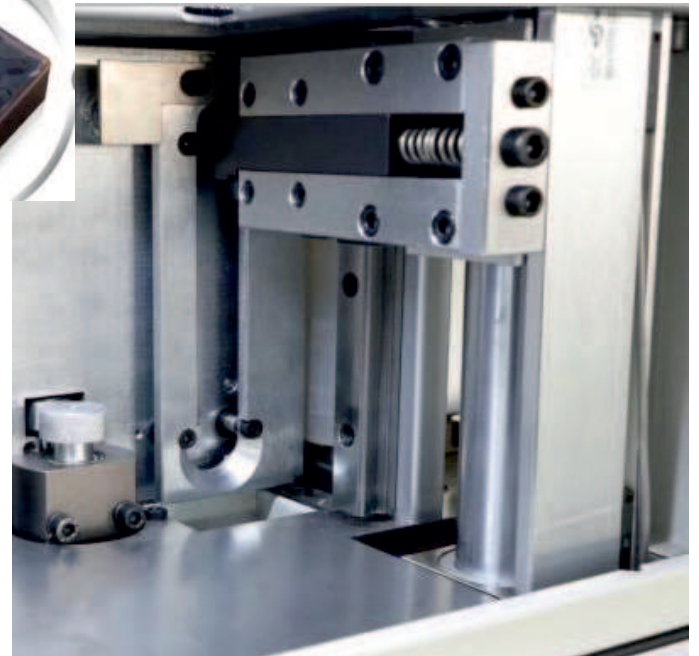

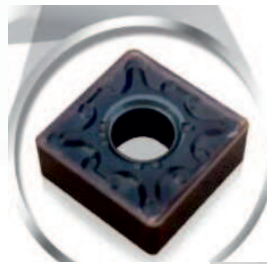

Working Principle	Auto Feeding, Auto Slot, Auto Bending
Application Material	Flat Aluminum, Plastic Coil
Slot Degree	45°- 135°(No limit for flat materials)
Material Width	≤ 100mm
Bending Radius	≥ 3mm
Material Thickness	0.3-0.8mm
Total Power	300W
Machine Size	1500 mm* 500mm* 500mm
Weight	100KG
Voltage	220V
Air Pressure	0.4-0.8MPa
File Format	Plt, Dxf

Parts of Machine

Bender

The min. Bending Radius is only 3mm , it can make small letters very well. Flat Copper bender can make sure the material bending smoothly, avoid scratch the material surface.

Planner Cutter:

The planner cutter is made with finished hard Alloy, cutting stable and smooth, blade grain with 8 tips can be used separately, maintenance-free, and free grinding, low cost.

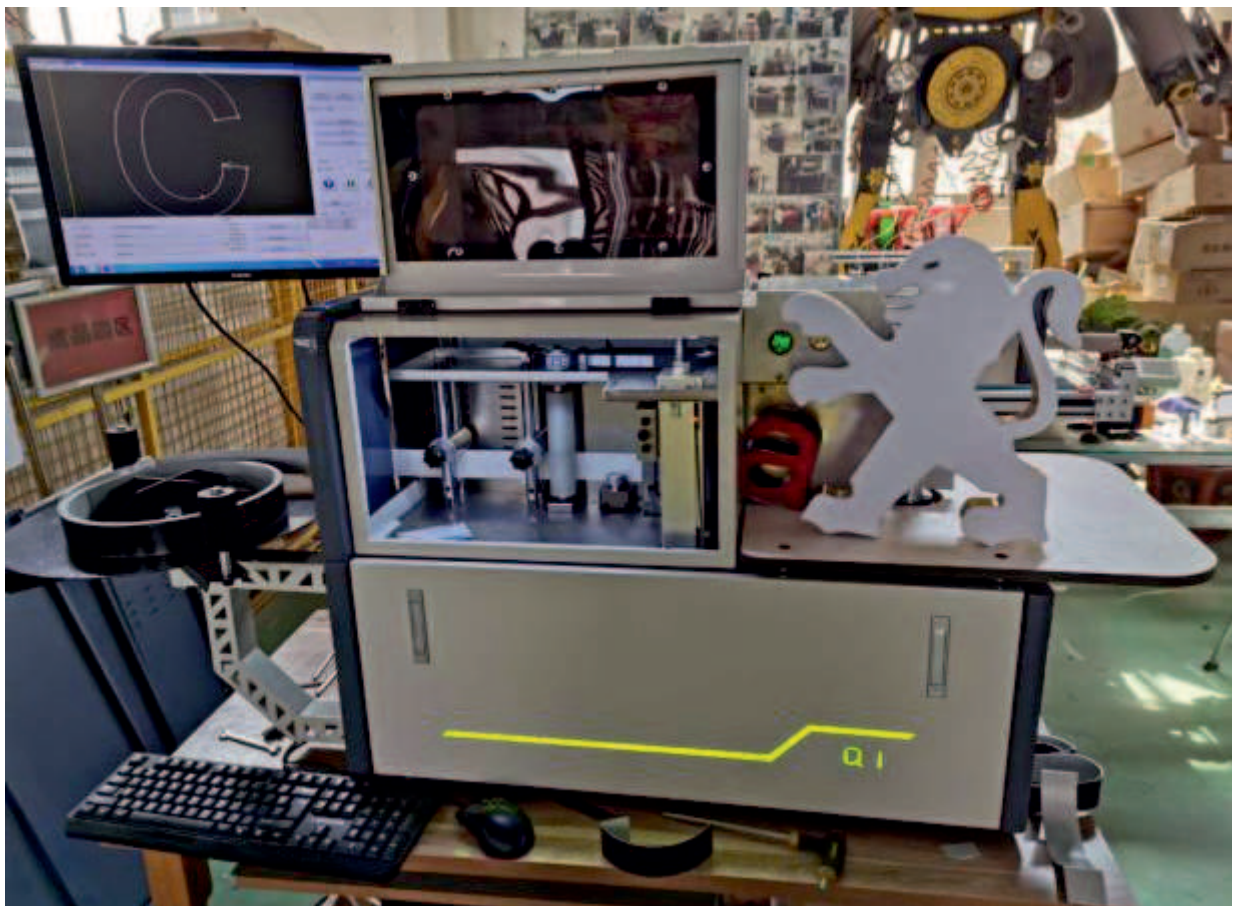

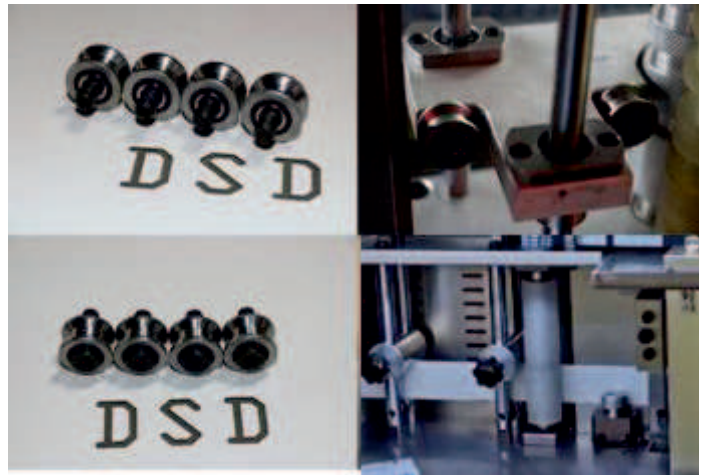

Feeding and cutting Part:

Feeding material stable; Separate design, convenient to assembly and repair.

Starting, feeding and return options are One button operation, very easy.

Add Rolling type feeding mechanism, Feeding more smoothly.
